WORKING EXPERIENCE

January 2015 - now : GODEV.CO

Projects :

Lifeaid Beverages | <https://www.lifeaidbevco.com> | <https://www.lifeaidbevco.au> | <https://www.lifeaidbevco.eu>
(2015 - now)

Technology used : Magento, Magento 2, JavaScript, jQuery, PrototypeJs, CSS (SASS), HTML, MySQL

Versioning : GitLab

Contribution :

Work in a team to rebuild an existing e-commerce to a new integrated system (Magento). Support the active e-commerce with building new features, bug fixes and customization to cater the clients needs in purpose for greater sale.

Within this project I work with various APIs to integrate with the website (Facebook Login, Stripe, Authnet.cim, PayFast, PayPal Checkout, StarShipIT, Infusionsoft) and help with the integration and automation to another system (Zapier, ConvertFlow).

J&T Express | <http://www.jet.co.id> | <http://www.itexpress.my>

(2016 - now)

Technology used : Laravel, JavaScript, CSS, HTML, MySQL

Versioning : GitLab

Contribution :

Build, implement new design and pitch ideas for flat and responsive design. Retrieve and submit data using API. Integrate CMS plugin with Laravel.

AncientFaces | <https://www.ancientfaces.com>

(2016 - now)

Technology used : Kohana, JavaScript, CSS (LESS), HTML, PostgreSQL

Versioning : GitHub

Contribution :

Implement new features and bug fix. Work closely with the client to discuss the implementation of new features so that it would not harm the existing active website. Founded in 2000, the website has millions of data, so one of the biggest challenge is to make sure database querying (read and update) is efficient. Within this project, I also

got the chance to learn a lot about SEO optimization to make the website search rank higher. API integration is used to boost the content (Facebook comments) and to display advertising.

Kusalayani | <https://kusalayani.org>

(2016 - now)

Technology used : Wordpress, JavaScript, CSS, HTML, MySQL

Versioning : GitLab

Contribution :

Designed, developed, and support the organization's profile website. Build with WordPress, this website is actively used to update its pupil on the latest activity within the place and upcoming events with its calendar feature. To cater the interests of people who don't speak Bahasa Indonesia, this website is bilingual and can be switched to English version.

Wetland Company

<https://wetlandcompany.com>

Technology used : Magento, JavaScript, CSS (SASS), HTML, MySQL

Versioning : GitLab

Contribution : Work in a team to build the e-commerce and implement the front-end design.

GODEV.CO | <http://www.godev.co>

(2016 - now)

Technology used : Laravel, JavaScript, CSS, HTML, MySQL

Versioning : GitLab

Contribution : Designed, developed, and support the company's website.

Other:

GOINVITE | <http://goinvite.co>

(2016 - now)

Technology used : Laravel, JavaScript, CSS, HTML, MySQL

Versioning : GitLab

Contribution :

Designed, developed, and lead a team of two to deliver a website where bride and groom can create e-invitation for their wedding.

heytheregrace.com

(personal blog)

Technology used : Wordpress, JavaScript, CSS (LESS), HTML, MySQL

Versioning : GitLab

Contribution : design, develop, and customize existing themes.

June 2012 - December 2014 : Accenture Indonesia

SAP CRM Functional Analyst

Analyze user's requirement, make functional design and coordinate with development team to build a high quality program.

Build test cases and scripts and test the program so it can be highly functioning with minimum error.
